Art Unit: 1636

This application is in condition for allowance except for the following formal matters:

Claims 6-15 and 31-40 are directed to an invention non-elected with traverse in the reply filed on 22 January 2007. Applicant is given the reply period set by this letter to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

Applicant argues, at pages 2 and 3 of the response filed 22 January 2007: 1) that all of the disclosed plasmids are synthesized according to the same design, being synthesized of structural units that are not plasmids. However, the disparate nature of the inventions is evident from their different sequences. The plasmids are not indistinct, i.e., not legally separable, merely because they lack the same feature, i.e., pre-existing plasmids sequences. 2) Applicant argues that the plasmids share a common purpose, i.e., protein co-expression, and thus may be used together. However, the plasmids can be used separately, and would need to be searched separately, thus evidencing both distinctness and a burden of search. In 3), 4) and 5), Applicant again argues that the plasmids, in having compatible origins of replication, can be used together. This point is addressed above, with respect to point 2).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
